Paper 1

Title:	Study on night view representation of ancient architectural color in china
Author keywords:	ancient architectural colour typical light source chromatic aberration historic light source
Abstract:	Chinese ancient buildings existed for thousands of years. People have formed a deep impression on the color characteristics of ancient buildings in long-term aesthetic consciousness. However, how to express the ancient architectural colors in line with people's cognitive habits about ancient buildings in the night view, which means the 'authenticity' in the night view research of medieval architectural, there is no targeted basis and recommendations. The study plan of this article combined with the ancient buildings' strong color characteristics and illumination light color performance characteristics to conduct integrated studies about night color performance evaluation, in order to acquire the conclusions of the preliminary study in the application of Chinese ancient building lighting research. Meanwhile, provide theoretical basis for the reasonable color expression to ancient architectural lighting.
